

## IT OU GPO Implementation

### Description:

- Implemented core IT security policies for the IT Users OU to simulate a realistic corporate environment.
- **Password Policy:** Enforced complex passwords with a 90-day expiration to improve account security.
- **Account Lockout Policy:** Locked user accounts after 5 failed login attempts with a 15-minute reset, preventing brute-force attacks.
- **USB Device Restriction:** Blocked access to all removable storage to reduce the risk of malware and unauthorized data transfer.

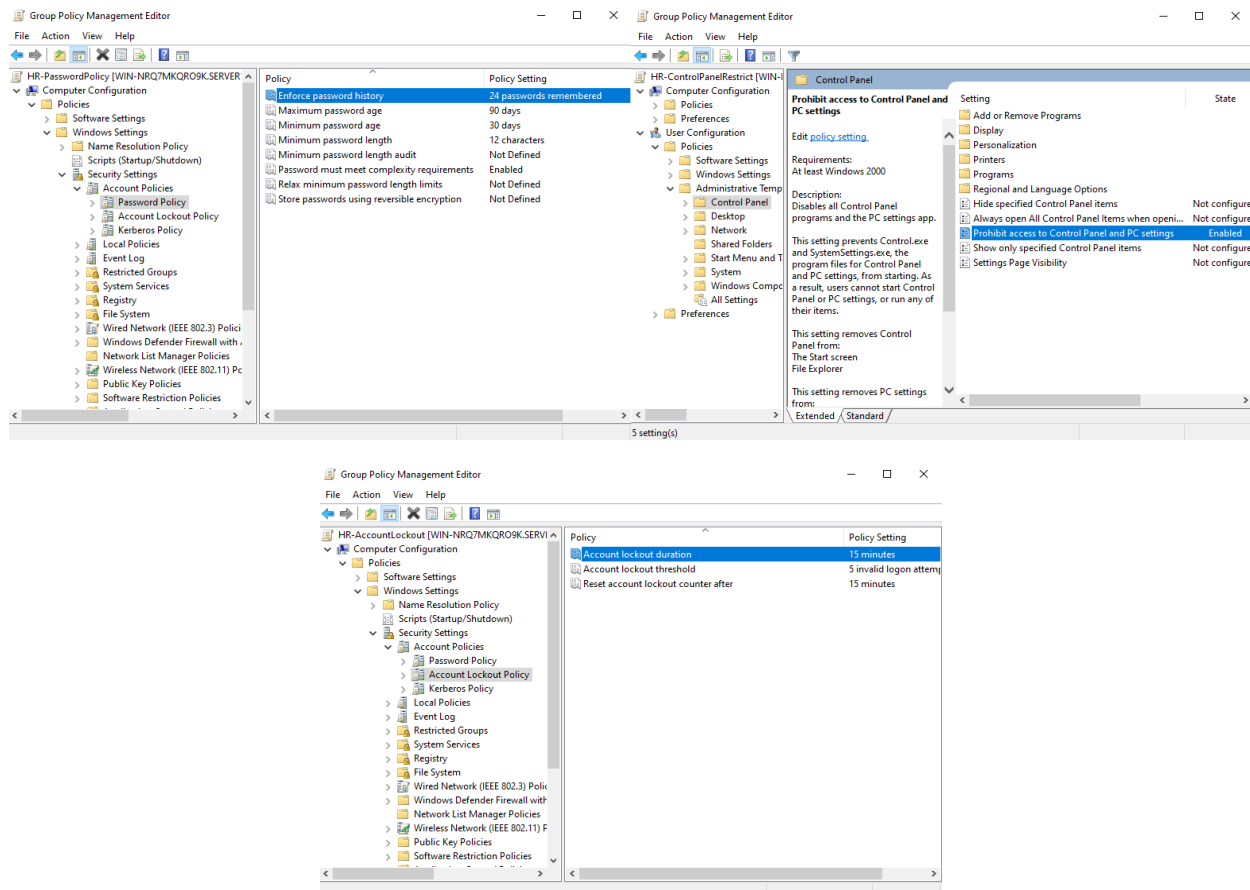

## HR OU GPO Implementation

### Description:

- Implemented core HR user policies in the HR Users OU to simulate a realistic corporate environment with a balance of usability and security.
- **Password Policy:** Enforced moderate complexity passwords with a 90-day expiration to protect user accounts while remaining user-friendly.

- **Account Lockout Policy:** Locked accounts after 5 failed login attempts with a 15-minute reset to prevent unauthorized access via brute-force attacks.
- **Control Panel Restriction:** Blocked access to the Control Panel and PC settings, reducing risk of accidental or unauthorized system changes.

## Accounting OU GPO Implementation

### Description:

- Implemented key security and operational policies for the Accounting Users OU to simulate a corporate environment managing sensitive financial data.
- **Password Policy:** Enforced complex passwords with a 60-day expiration to ensure strong account security.
- **Account Lockout Policy:** Locked accounts after 5 failed login attempts with a 15-minute reset to prevent unauthorized access.
- **USB Device Restriction:** Blocked all removable storage to reduce risk of malware and data exfiltration.
- **Deny Logon Locally:** Prevented Accounting users from logging in on non-Accounting machines, improving endpoint security.
- **Allow Remote Desktop Services:** Enabled remote logon for Accounting users to access authorized systems securely.
